EXPERIENCE

ThinkLab, Shanghai Jiao Tong University, Shanghai, China Jul. 2021 – Present

Researcher Supervisor: Prof. Junchi Yan

See Publications for research outputs.

- Undergraduate researcher and master researcher.
- Research interests lie deep generative models and combinatorial optimization on graphs.

Learning Optimization Solver Project, with Huawei Noah's Ark Lab Apr. 2022 – Feb. 2023

Researcher Leader/Mentor: Xijun Li and Prof. Junchi Yan

Main objects lie in the developing superior SAT solvers and exploring insightful ideas regarding the SAT problem, ultimately making valuable contributions to both the research community and practical applications.

- The solver Kissat_Adaptive_Restart that I was personally responsible for achieved 12th place in Anniversary Track and 26th place in Main Track worldwide
- The solving strategy is ready to be integrated into Huawei's practical applications, with an average performance gain of around 15% and a maximum performance improvement of 97%.
- A paper on SAT instance generation was accepted in KDD 2023.
